HELVETICA PHYSICA ACTA

VOLUMEN 63, 1990

CONTENTS – INHALTSVERZEICHNIS – TABLE DES MATIÈRES

Fascicle 1/2
15. 12. 1989

Editorial 1
Krause, A.: Baryon matrix elements of the vector current in chiral perturbation theory . . 3
Piguet, O., and Sibold, K.: The supercurrent and β-functions vanishing to all orders in stricly massless supersymmetric Yang-Mills theories 71
Pasztor-Kraus, J.: Scattering theory in external fields slowly decaying in time 86
Graf, G.M.: Phase space analysis of the charge transfer model 107
Honegger, R.: Unbounded perturbations of Boson equilibrium states in their GNS- representations 139
Feldman, J., and Trubowitz, E.: Perturbation theory for many Fermion systems 156

Fascicle 3
26. 2. 1990

Dombre, T.: The Hubbard model for large U 261
Wölfle, P.: The Anderson lattice 284
Lavagna, M.: Slave-boson approaches to strongly correlated systems 310
Arovas, D.P.: Mean field theories of the quantum Heisenberg model 323
Rice, T.M.: Flux phases in the *t-J* model 336
Horsch, P.: Quasiparticles and photoemission spectra in correlated fermion systems 345
Metzner, W., and Vollhardt, D.: Correlated lattice fermions in high dimensions 364

Fascicle 4
5. 4. 1990

Ott, H.R.: Foreword 377
Triftshäuser, W., Kögel, G., Schreckenbach, K., and Krusche, B.: The pulsed positron beam in Munich and a high intense positron source..at.Grenoble 378
Tanigawa, S.: Present and future positron beams in Japan 385
Lynn, K.G.: Recent studies in annihilation related studies by slow positrons 389
Manuel, A.A., and Peter, M.: Need of intense positron beams for solid state applications of positron annihilation 397
Seeger, A., and Banhart, F.: Defect studies by positron annihilation – techniques, achievements, problems, perspectives 403
Hautojärvi, P., and Huomo, H.: The laboratory positron beam in Helsinki: applications to positron dynamics in 429
Zimmermann, U.: Possible source techniques at PSI for slow positron beams 435
Taqqu, D.: High efficiency positron moderation 442
Waeber, W.B.: Positron microscopy, a possible new experiment at PSI 448
Peter, M., and Manuel, A.A.: Summing up 458
Doudin, B., and Heine, V.: The incommensurate γ phase of n-propylammonium tetrachloro-metallates 471
Hürlimann, E., Trittibach, R., and Bilgram, J.H.: The volume of dendrites 473
Egolf, P.W., and Weiss, D.A.: A Hopf bifurcation in a self-organizing helium II surface system 475
Steininger, R., and Bilgram, J.H.: Light scattering experiments at the solid-liquid interface of a molten sphere 477
Mendik, M., and Wachter, P.: Inelastic light scattering (Brillouin) from Rayleigh modes on different surfaces of Ni single crystals 479

Müller, E., Nissen, H.-U., Ospelt, M., and Känel von, H.: Temperature stability of interfacial ordering in strained layer Si-Ge superlattices 481
Nissen, H.-U.: 12-Fold symmetric 2d tilings by two pentagons or two quadrangles 483
Hildebrand, P., Merté, B., and Lüscher, E.: Pattern formation on the surface of a frozen lake . 485
Hadwich, G., Merté, B., Hübler, A., and Lüscher, E.: Stationary dendritic structures in an electric field 487
Guarisco, D., Vaterlaus, A, Lutz, M., Aeschlimann, M., Stampanoni, M., and Meier, F.: Different spin and lattice temperatures observed by spin-polarized photoemission with laser pulses 489
Colchero, J., Marti, O., and Mlynek, J.: Ein kompaktes Kraftmikroskop aufgebaut mit Laserdiode und positionsempfindlicher Photodiode 491
Romero, J., Fleischer, T., and Huguenin, R.: DC size effects measurements in aluminium up to 30 K 493
Jaquier, A., Probst, P.-A., and Huguenin, R.: Radio-frequency-size-effect measurements of the scattering rates in Cd below 1K 495
Haberkern, R., Osiander, R., Korpiun, P., and Lüscher, E.: Photoacoustic investigation of thermal diffusion on random structures 497
Tang, X.-M., Weber, J., Finger, F., and Viret, V.: Era-measurement of the H-concentration in a-Si: H as a function of the annealing temperature 499
Tang, X.-M., Weber, J., Finger, F., and Viret, V.: Hydrogen diffusion in a-Si:H 501
Abukay, D., Nakano, H., Suzuki, M., Burri, G., and Rinderer, L.: A study of the effects of annealing on thin films of Bi-(Pb)-Sr-Ca-Cu-O 503
Gauzzi, A., Mathieu, H.J., James, J.H., and Kellett, B.: AES, XPS and SIMS characterization of $YBa_2Cu_3O_7$ superconducting high Tc thin films 505
Holguin, E., Berger, H., and Loude, J.-F.: Dynamics of flux penetration in superconducting Y-Ba-Cu-O hollow cylinders 507
Suzuki, M., Abukay, D., Nakano, H., and Rinderer, L.: Tunneling study of high T_c Bi-system film 509
Nakano, H., Suzuki, M., Abukay, D., Nicoud, S., and Rinderer, L.: I-V characteristics in Bi-(Pb)-Sr-Ca-Cu-O films 511
James, J.H., Proctor, M.J., Faure, C., Baer, W., and Reinhart, F.K.: SiO_2/TiO_2 quarter wave dielectric mirrors for vertical cavity surface emitting lasers 513
Soares, V., Meyer, E., and Rinderer, L.: Influence of cooling rate on the supercooling of metals with high melting point 515
Tiwari, A.N., Floeder, W., Blunier, S., Zogg, H., and Weibel, H.: Single crystal thin film CdTe solar cells 517
Araujo, D., Zimmermann, B., Ganière, J.-D., and Reinhart, F.K.: Etude des recombinaisons radiatives et non radiatives dans des multipuits quantiques 519
Pavesi, L., Martin, D., Morier-Genoud, F., and Reinhart, F.K.: Hydrogen passivation of III-V semiconductors 521
Marti, U., Martin, D., Morier-Genoud, F., Senior, B., and Reinhart, F.K.: Holographic nm-lithography and growth on fine gratings by molecular beam epitaxy (MBE) 523
Vasey, F., Stauffer, J.M., Oppliger, Y., and Reinhart, F.K.: Realization of grating couplers on $Al_xGa_{1-x}As$ rib waveguides using electron beam lithography 525
Oetliker, M., and Bürgi, A.: Collisions of heavy ions with carbon foils:equilibrium charge states at energies from 0.5 to 2 keV/amu 527
Carnal, O., Grimm, R., and Mlynek, J.: A simple lock-in technique to measure narrow velocity distributions in atomic beams 529
Schneider, S.M.O.L., Hübner, B., and Frey, L.: Ein mathematisches Modell zur Lösung des Nullimpulsproblems bei Inkremental-Drehgebern 531
Oehler, O., Rusch, P., and Dornbierer, S.: A calorimeter based on ultrasonics 533
Schulz, H.C., Kautzky, T., and Lüscher, E.: A model for the pattern formation due to erosion . . 535
Rose, M., Schulz, C.H., Kautzky, T., and Lüscher, E.: Intermittency in the Karman vortex street . 537
Athelogou, M., Kaltner, H., Kitzbichler, J., Elender, E., and Lüscher, E.: Extremal properties of dendritic structures: investigations on systems of blood-vessels 539

Bernasconi, A., Breedon, R.E., Camilleri, L., Cool, R.L., Cox, P.T., Dick, L., Dukes, E.C., Gaille, F., Giacomelli, P., Joseph, C., Kubischta, W., Loude, J.F., Malamud, E., Morel. C., Overseth, O.E., Pagès, J.L., Perroud, J.P., Cushman, P., Rüegger, D., Rusack, R., Snow, G.R., Sozzi, G., Trân, M.T., Vacchi, A., and Valenti, G.: Measurement of the J/ψ inclusive cross sections in pbar-p and p-p collisions at $\sqrt{s} = 24.3$ GeV from UA6 experiment 541

Jacot-Guillarmod, R., Mulhauser, F., Piller, C., Schaller, L.A., Schellenberg, L., and Schneuwly, H.: Muon transfer to low Z elements 543

Mulhauser, F., Jacot-Guillarmod, R., Piller, C., Schaller, L.A., Schellenberg, L., and Schneuwly, H.: Muon transfer in $H_2 + SO_2$ gas mixtures 545

Sayasov, Y.S.: Interference phenomena in reactions of muon transfer from protium to heavier nuclei 547

Thurner, V., Eberl, W., Hübler, A., Packard, N., and Lüscher, E.: Determination of the absolute maximum of polynomials by algebraic bisection 549

Scholz, Ch., Eberl, W., Birken, K., Zaunseder, S., and Lüscher, E.: The influence of asynchronous control on the geometry of cellular automaton patterns 551

Chevalier, J.: Angular momentum, spin and energy-momentum localization in Scherrer's formalism of general relativity 553

Eberl, W., Hübler, A., Packard, N., and Lüscher, E.: Unique models for stochastic dynamics . 555

Fascicle 5
15. 6. 1990

Papoyan, Vl. V., and Zagrebnov, V.A.: On generalized Bose-Einstein condensation in the almost-ideal boson gas 557

Singh, M.: Time interval statistics of the Brillouin spectrum 565

Assaad, F.F.: Quantum Monte Carlo simulations of the two dimensional single band Hubbard model 580

Loeffel, J.-J.: Gérard Wanders 602

Liste des publications de Gérard Wanders 603

Caussignac, Ph., Gerbi, S., and Renggli, L.: About admissible boundary conditions for Euler and parabolized Navier-Stokes equations 606

Martin, A.: Interparticle distance in N boson systems 616

Roy, S.M.: Pion-pion scattering 627

Leutwyler, H.: Dirac operator and Chern-Simons action 660

Joos, H.: The geometric Schwinger model on the torus I 670

Piguet, O., and Sorella, S.P.: Supercurrent without auxiliary fields 683

Raina, A.K.: Analyticity and chiral fermions on a Riemann surface 694

Fascicle 6
30. 8. 1990

Macris, N., Martin, Ph.A., and Pulé, J.: A statistical mechanical model for equilibrium ionization 705

Schryber, U.: PSI - Beschleuniger heute und morgen 755

Fischer, W.E.: Die Spallationsquelle: ein Instrument für die Physik der kondensierten Materie . 756

Grossmann, S.: Selfsimilarity. A basic principle of nature - From geometry to analysis 762

Busse, F.H.: Transition to turbulence in thermal convection 767

Genoud, P., Hoffmann, L., Jarlborg, T., Manuel, A.A., Massidda, S., Peter, M., Sadowski, W., and Walker, E.: Two particle momentum distribution in metals and superconducting oxides . . 773

Wiesendanger, R., Güntherodt, H.-J., Güntherodt, G., Gambino, R.J., and Ruf, R.: Measurement of the local electron spin polarization by the scanning tunneling microscope 778

Abraham, D.L., Alvarado, S.F., Schönenberger, C., Arent, D.J., and Meier, H.P.: STM and luminescence 783

Fayet, P., Eberhardt, W., Cox, D., Fu, Z., Sondericker, D., Sherwood, R., and Kaldor, A.: Caractère non metallique des clusters de platine Pt_n (n = 1 à 6) 787

Calpini, B., Croci, M., David, R., and Monot, R.: Time of flight (TOF) spectrometer for molecular adsorption kinetics measurement 789

Jobin, M., Emch, R., Zenhausern, F., Steinemann, S., and Descouts, P.: Scanning tunneling microscopy / spectroscopy of Titanium in air . . . 791
Meyer, E., Heinzelmann, H., Brodbeck, D., Overney, G., Howald, L., and Güntherodt, H.-J.: Atomic force microscopy: High resolution and contrast mechanism . . . 793
Cors, J., Cattani, D., Decroux, M., Seeber, B., and Fischer, Ø.: The critical field of $PbMo_6S_8$ measured by specific heat . . . 795
Cattani, D., Cors, J., Decroux, M., Seeber, B., and Fischer, Ø.: Critical current densities and granular nature of $PbMo_6S_8$ . . . 797
Suzuki, M., Nakano, H., Curt, S., Burri, G., and Rinderer, L.: Single crystal growth and characterization of high-T_c Bi System . . . 799
Antognazza, L., Triscone, J.-M., Brunner, O., Karkut, M.G., and Fischer, Ø.: Properties of ultrathin $YBa_2Cu_3O_7$ layers in $YBa_2Cu_3O_7/PrBa_2Cu_3O_7$ superlattices . . . 801
Brunner, O., Triscone, J.-M., Antognazza, L., Karkut, M.G., and Fischer, Ø.: Critical field of artificial $YBa_2Cu_3O_7/PrBa_2Cu_3O_7$ superlattices . . . 803
Palmy, C., and Füllemann, F.: Thermal induced rotation of a levitated permanent magnet above a superconducting disk . . . 805
Mendik, M., Ospelt, M., Känel, H. von, and Wachter, P.: Characterization of $Si_{1-x}Ge_x$ films by inelastic light (Brillouin) scattering from surface acoustic modes . . . 807
Egolf, P.W., Nardo, S. di, and Caminada, P.: Second sound and gravity waves in an open cylindrical vessel - interacting resonances . . . 809
Romero, J., Schmidt, M., Steinemann, S., and Huguenin, R.: DC size effects in Al: surface structure by XPS and SEM . . . 811
Morel, J., Rosenfeld, D., and Maystre, F.: Fabrication and characterization of a Nd^{3+} doped monomode fiber laser . . . 813
Broggi, G., Badii, R., and Finardi, M.: Recursive symbolic encoding and hierarchical description of chaotic signals . . . 815
Broggi, G., Badii, R., and Finardi, M.: Hierarchical approach to modelling of nonlinear flows: application to Lorenz-like systems . . . 817
Holzner, R., and McCord, A.W.: Escaping from an attractor close to a Hopf bifurcation . . . 819
Merté, B., Müller, J., Rückerl, R., Hildebrand, P., and Lüscher, E.: Comparison of three different numerical methods to characterize the geometry of dendritic structures . . . 821
Pöschl, P., Athelogou, M., and Lüscher, E.: Improvements of programs to reconstruct differential equations from experimental data . . . 823
McCord, A.W.: The role of diffraction in optical nonlinear dynamics . . . 825
Acklin, B., and Dupertuis, M.A.: Design of an optically bistable Fabry-Perot device based on all-epitaxially grown AlGaAs . . . 827
Oehler, O., Wieland, J., Raillard, D., and Schumacher, M.: A mechanically tuned ultrasonic calorimeter . . . 829
Ky, N.H., Araujo, D., Pavesi, L., Ganière, J.-D., and Reinhart, F.K.: Luminescence study of Zn diffused GaAs . . . 831
Schwyn, S., and Lehmann, H.W.: RF-sputter deposition of waveguiding $LiNbO_3$-layers . . . 833
Berseth, C.-A., Wüthrich, C., and Reinhart, F.K.: Measurement of the electro-optic coefficients of GaAs at 1.32μm and 1.52μm . . . 835
Cao, S., Wüthrich, C., Berseth, C.A., Ganière, J.D., Martin, D., Morrier-Genoud, F., and Reinhart, F.K.: Fabrication et caractérisation de lasers à semiconducteur destinés au pompage optique d'étalons de fréquence au Cs . . . 837
Schibler, G.: An efficient algorithm for solving systems of equations . . . 839
Assaad, F.F., and Würtz, D.: Numerical simulations of the one-dimensional t-J model . . . 841
Groot, C. de, Würtz, D., and Hoffmann, K.H.: Simulated annealing and evolution strategy - a comparison . . . 843
Reimann, P., and Talkner, P.: Probability densities for discrete dynamical systems with weak noise . . . 845
Koch, A.-J., Guerreiro, J., and Rothen, F.: Un modèle de morphogénèse . . . 847

Fascicle 7
15. 10. 1990

Fassari, S.: On the bound states of non-relativistic Krönig-Penney Hamiltonians with short range impurities 849
Fassari, S.: On the bound states of relativistic Krönig-Penney Hamiltonians with short range impurities 884
Detcheva, V., Metodieva, M., Kandilarov, B.D., and Primatarowa, M.T.: Dirac equation approach to scattering from interface potential steps and existence of interface states 908
Li, F.: A non relativistic supersymmetric two body equation for scalar and spinor particles 922
Gisin, N.: Pure state quantum stochastic differential equations in C_2 929
Boulat, B.: Mécanique dans l'espace de phase. L'approche des déformations 940

Fascicle 8
24. 11. 1990

Heusler, M.: Higher-dimensional homogeneous cosmological models 965
